DBA Flake Shelf-life Statement:

An approximate shelf life of DBA Flake is 2 years, if the product is stored in the original container, kept tightly closed and dry, in a well-ventilated location. Because storage and local ambient conditions vary and INVISTA has no control over the practices, procedures and conditions at your or other locations, the shelf life estimate provided here should be used as guidance only. It is not provided as a guarantee of any shelf life.

DBA Flake Source Statement:

We advise you that INVISTA's DBA Flake made in the U.S. is manufactured from petrochemical-based feed stocks. However, a support material of animal origin and vegetable origin, specifically a product that contains bovine tallow derivatives and corn, is used upstream in the manufacturing process of DBA Flake.

DBA Flake SVHC Statement:

Based on our knowledge, we advise you, that DBA Flake is not listed as a SVHC substances on the EU Candidate List of Substances of Very High Concern (as updated on 15 January 2019 <https://echa.europa.eu/candidate-list-table>). INVISTA does not include as an intentional additive or ingredient any SVHC substances in the manufacture of DBA Flake.

Please note however, that INVISTA does not analyze DBA Flake for SVHC substances on a routine basis with the exception of dimethyl sulfate (CAS# 77-78-1) which is present as an impurity and is monitored.
